

# TEN88

## Rights & Clearance Support

TEN88 supports productions by helping organize music-rights information before songs move into sync review.

### Rights Support

- Publishing and split documentation support
- Creator and rights-holder coordination
- Clearance-ready record organization
- Catalog and ownership review support
- Communication between artists, producers, labels, and production partners

### Why It Matters

Music that is creatively strong but poorly documented can slow down a production. TEN88 focuses on both creative sourcing and rights-readiness so opportunities can move more efficiently.

### Best Fit

Productions looking for independent music, custom music, producer access, or a rights-conscious music partner.
