

WHO WE ARE

Traffic Plan is a Nationally Certified Women's Business Enterprise providing superior traffic safety solutions to Utility Companies, Municipalities and Private Contractors.

We employ highly-trained, highly-disciplined ATTSA-certified union employees from central locations throughout New Jersey and Pennsylvania. Working together toward a greater purpose, our teams strive to serve the greater good by safeguarding our roadways and supporting a stronger infrastructure.

Because we know that strong leadership ensures the most coordinated crews on the road, we have the highest ratio of supervisors to crew, 1 to 10. And our supervisors—many from law enforcement—set the highest standards for their crews in professionalism, competence, unity and conduct.

OUR SERVICES

Traffic Control Crews

24/7 protection for your workers, equipment and community.
Setup, flagging and work zone maintenance with professional traffic control.

Who's The Crew:

Our crews are dedicated, unionized professionals. Each crew is comprised of: ATSSA certified crew leader and traffic control technician | Appropriate personal protective equipment | Retro-Reflective striped crew truck with emergency strobe lights | Communication equipment | Appropriate construction signs, cones and stands.

Superior Supervision:

Many of our ATTSA-Certified Supervisors are experienced in law-enforcement and related fields. They coordinate with local municipalities, traffic control bureaus and state and federal agencies.

No Central Dispatch:

Our customers enjoy direct contact with one of our local supervisors. This is one of many ways we ensure accurate communication, less downtime and increased productivity.

Designing and Filing

What's more complex: designing a safe site or filing the paperwork?
Neither, if you use our compliant, cost-effective services.

End-To-End Service:

Beginning with a site visit, our technicians offer complete design and filing of traffic plans to you and your customer. We can also provide an on-site MUTCD and ATSSA-certified staff member upon request for job site safety survey and evaluation.

Safe, Strategic & Always On Time:

Creating the best customer experience means we advocate for your best interests, ensure open communication and deliver on schedule. Strictly superior service means everyone on our team shares our core values of excellence, service and safety.

Traffic Control Design Specialists:

When you work with us, expect accurate, detail-oriented problem-solving that meets or exceeds the strict requirements of all concerned agencies. We're committed to serving you and protecting the community.

Training and Certification Services

We train your people.

Secure ATSSA professional flagger training and certification for your own employees.

Sharing Knowledge. Inspiring Excellence:

Our top trainers lend their knowledge and experience to creating the next generation of leaders in the traffic control field. We demand more from ourselves, and that's passed on through our courses.

Professionalism, Competence, Unity:

We understand the pressures and hazards of this kind of work, so our program turns out highly trained, highly disciplined team members who leave nothing to chance. We can't accept anything less from the people who safeguard our roadways.

Certifications & More:

Out there on the road, we're trusted to protect the project, equipment, workers and the community. Upon completion, our students leave with a certificate and a sense of purpose.

Safety Equipment Rental and Sales

Buy and rent equipment with complete confidence.

Experience the difference when you work with Traffic Plan.

Strong Support Matters:

Customers place their trust in us, so we maintain a highly-trained, experienced staff and well-tested, top-quality equipment. Having an industry-leading guide through this process can make or break your project.

Truck-Mounted Attenuators:

Traffic Plan can provide a Truck-Mounted Attenuator, paired with a trained and experienced operator whose priority is the safety of your crew members and community.

Informed, Experienced Salespeople:

We stay up-to-date and we know this equipment inside and out: Light Towers | Traffic Drums | Truck-Mounted Attenuators | Arrow and Message Boards | Barricades, Barrels and Cones | Construction Signs and Stands.

IN SUMMARY

Traffic control comes with a unique set of pressures, hazards and responsibilities. We demand more from ourselves, so we can deliver safer and more efficient service at a better price. We partner with you to ensure the success of your company and your projects. And we hope we'll get the chance to serve you, and show you the traffic plan difference.

Thank you for taking the time to learn about our company.

Mary Kiely and Caroline Kiely

Driven by safety. United by purpose.
