Summary:

Random clerical jobs, waitressing and bussing tables in my teens. When I found photography I realized there was something magical about stopping time with a photo. Without a picture life is just a memory.

I enjoy letting my clients be themselves in front of my camera, no judgment as we are all beautiful.

I enjoy working with business owners, getting to know their product and message that they want to convey to their clients. It is my job to put all of that information in a visual form.

I enjoy working in the theater, documenting other artists performing their craft and the challenge of telling the story of the production in just a few images.
