

Galactic Armory Studios is a premier prop and hard surface fabrication studio based in Central New Jersey, positioned at the center of the state's expanding film and production infrastructure. Our team delivers end-to-end fabrication services, handling everything from concept development and design to final builds and on-set support.

Studio Capabilities

Our team provides comprehensive design and fabrication services for production. Our designers specialize in hard-surface modeling for props, armor, and set dressing, with capabilities including 3D design, rigging, rendering, pre-visualization, 3D scanning, and proprietary sizing software to support custom builds and costume department needs.

Galactic Armory fabricates a wide range of production props, including hero props, stunt props, set dressing, wearable elements, and props with engineered FX/SFX functionality, while our costuming team produces helmets and full armor systems with integrated electronics and stunt-ready construction for film and television production.

Facility Capabilities

- Automotive grade paint and post-processing booths
- Professional mold making and rotational casting
- Large format vacuum forming
- On-site FDM and SLA 3D printing farm for prototyping and production
- Full engineering support for fabrication and electronics integration
- Fully equipped woodworking and fabrication shop
- Certified hot-work capabilities and personnel
- Cinema-quality paint and finishing processes

Media Capabilities

- On-site media production with cinema grade equipment
- Editorial and graphics design
- Fabrication documentation and behind-the-scenes content
- On-set BTS documentation
- Social media and marketing support
- Lighting, VFX sampling, and vignette testing
