3D Printing • Voiceover • Audio Production

New Jersey | btedzz@gmail.com | 908-812-7652

Professional Profile

Creative technologist specializing in 3D printing, audio production, and voice recording for film, television, and digital media. Experienced in sourcing, adapting, and producing high-quality 3D-printed props and assets, with a focus on precision, efficiency, and production-ready results. Creator of 3D-printed products currently featured in two retail locations in Clinton, New Jersey.

Offers professional-grade audio and voice recording using studio equipment, delivering clean, broadcast-quality sound for voiceover, narration, and media production. Known for reliability, attention to detail, and the ability to support fast-paced production environments.

Production Services
